

## Dr. Brian Guy honoured with Engineers and Geoscientists British Columbia's highest award for contributions to geoscience

Vancouver, British Columbia – October 20, 2017 – Engineers and Geoscientists British Columbia (EGBC), representing the province's engineering and geoscience professionals, presented Dr. Brian Guy, P.Geo. with the C.J. Westerman Memorial Award, British Columbia's highest award for contributions to the geoscience profession.

The award recognizes Brian for his technical excellence, leadership, and professional and community service contributions. Over his 35-year career in geoscience and water resources management, Brian established himself as a water resources specialist, project manager, and business leader. In 1994, he founded Summit Environmental Consultants Ltd. in Vernon, growing the company to become a leading environmental consulting firm in the Okanagan, before merging with the Associated Engineering group of companies in 2010.

As a water resources specialist, he participated in the Okanagan Water Supply and Demand Project Partnership - the most extensive water supply and demand assessment ever conducted in Western Canada. Brian made significant contributions to the development, leadership, and support of important technical organizations, such as the Canadian Water Resources Association and the Okanagan Water Stewardship Council. He also sponsored several community organizations such as the Okanagan Science Center and the Maven Lane Childcare and Early Learning Centre.

"Brian's integrity, dedication and commitment to creating resilient solutions to our clients' problems in a sustainable and environmentally sensitive manner is an example for us all," says Kerry Rudd, President & CEO of Associated Engineering.

"Brian's contributions to the water industry is exemplary. He continues to play a key role in the understanding and management of Canada's water resources and environment," says John van der Eerden, Associated Engineering's Vice President, Water Resources.

The Engineers and Geoscientists British Columbia President's Awards are the province's top awards for professional engineers and professional geoscientists recognizing the outstanding professional, technical and community contributions made by its members. The C.J. Westerman Memorial Award was established in 1994 and is EGBC's premier award in professional geoscience.

### [About Associated Engineering](#)

Associated Engineering is an employee-owned, Canadian consulting firm with a 70-year history of providing uncompromising, client-focussed service. With more than 900 staff in 21 offices across Canada, we provide expertise in planning, engineering, environmental science, and landscape architecture. Our commitment to client satisfaction, technical excellence, and innovation has resulted in national and international recognition, including twice winning the Schreyer Award, the highest award for Canadian consulting engineers.

### [About Engineers and Geoscientists British Columbia](#)

Engineers and Geoscientists British Columbia is the business name of the Association of Professional Engineers and Geoscientists of the Province of British Columbia. The organization regulates and governs these professions under the authority of the Engineers and Geoscientists Act.
